

1. Which category of computer peripheral receives processed data from the computer and converts it into human-understandable form?

- | | |
|--------------------|---------------------|
| (A) Input Device | (B) Output Device |
| (C) Storage Device | (D) Processing Unit |

2. Which display cable interface is most commonly used today to transmit high-definition audio and video simultaneously?

- | | |
|----------|-----------------|
| (A) VGA | (B) HDMI |
| (C) PS/2 | (D) Serial Port |

3. What term describes the number of times per second a monitor updates its displayed image?

- | | |
|------------------|-------------------|
| (A) Refresh Rate | (B) Dot Pitch |
| (C) Color Depth | (D) Response Time |

4. Which type of printer is most suitable for heavy-duty office printing with high volume and low cost per page?

- | | |
|------------------------|--------------------|
| (A) Laser Printer | (B) Inkjet Printer |
| (C) Dot-Matrix Printer | (D) Plotter |

5. What unit is used to measure the refresh rate of a computer screen?

- | | |
|----------------|------------|
| (A) Hertz (Hz) | (B) Pixels |
| (C) DPI | (D) Bytes |

6. Which of the following hardware devices is strictly an output device?

- | | |
|--------------|-------------|
| (A) Mouse | (B) Printer |
| (C) Keyboard | (D) Scanner |

7. What kind of device is an interactive SMART Board or Touchscreen monitor?

- | | |
|----------------------------------|------------------------|
| (A) Input device only | (B) Output device only |
| (C) Hybrid (Both Input & Output) | (D) Processing unit |

8. Which port was traditionally blue with 15 pins and used to connect older CRT and LCD analog monitors?

- | | |
|-----------|--------------|
| (A) HDMI | (B) VGA |
| (C) USB-C | (D) Ethernet |

9. Which type of printer is widely used in ATMs and supermarket registers due to fast, inkless printing?

- | | |
|---------------------|------------------------|
| (A) Thermal Printer | (B) Dot-Matrix Printer |
| (C) Inkjet Printer | (D) Laser Printer |

10. Distance between two adjacent pixels of the same color on a monitor screen is called:

- (A) Dot Pitch
- (B) Aspect Ratio
- (C) Frame Rate
- (D) Screen Size

11. A subwoofer is a specialized loudspeaker dedicated to producing which type of sound frequencies?

- (A) High treble
- (B) Deep bass (low frequency)
- (C) Mid-range vocal
- (D) Ultrasonic sound

12. What is the full form of DPI in relation to printer performance?

- (A) Data Per Inch
- (B) Dots Per Inch
- (C) Display Pixel Index
- (D) Digital Output Image

13. Which device would an engineer use to print large engineering schematics and vinyl banners?

- (A) Plotter
- (B) Dot-matrix printer
- (C) Laser printer
- (D) Flatbed scanner

14. Non-impact printers differ from impact printers because they:

- (A) Strike paper physically
- (B) Print without physically touching paper with pins
- (C) Can only print black text
- (D) Produce loud mechanical noise

15. Which display property is defined as the ratio of brightness between the brightest white and darkest black?

- (A) Contrast Ratio
- (B) Color Depth
- (C) Viewing Angle
- (D) Pixel Density

16. What technology allows projectors to project images using thousands of tiny microscopic mirrors on a microchip?

- (A) DLP (Digital Light Processing)
- (B) CRT (Cathode Ray)
- (C) Dot Matrix
- (D) Inkjet Printing

17. Which output device provides physical tactile feedback or vibrations to a gaming user?

- (A) Haptic Gamepad / Controller
- (B) Standard Monitor
- (C) Speaker
- (D) Laser Printer

18. Modern laptops and smartphones often use which bright display technology that requires no backlight layer?

- (A) OLED
- (B) CRT
- (C) Dot Matrix
- (D) Plasma Tube

19. What feature in a printer allows it to automatically print on both sides of a page?

- (A) Duplex Printing (B) Simplex Printing
(C) Spooling (D) Collation

20. Audio standard 5.1 surround sound includes how many main full-frequency channels and subwoofer channels?

- (A) 5 main channels, 1 subwoofer (B) 1 main channel, 5 subwoofers
(C) 5 main channels, 5 subwoofers (D) 6 main channels, 0 subwoofers

21. A Braille embosser is a specialized output device designed to produce:

- (A) Raised tactile dots on paper for visually impaired readers (B) High resolution photo prints
(C) Audio feedback for speech (D) Architectural blueprints

22. What is the temporary holding area in computer memory where print jobs wait in line to be printed?

- (A) Print Spooler / Queue (B) ROM
(C) Hard Disk Drive (D) CPU Cache

23. What standard resolution does a Full HD (1080p) monitor possess?

- (A) 1920 x 1080 pixels (B) 1280 x 720 pixels
(C) 3840 x 2160 pixels (D) 800 x 600 pixels

24. Which output device uses light beams or laser diodes to scan computer images directly onto a drum before transferring ink toner?

- (A) Laser Printer (B) Dot Matrix Printer
(C) Inkjet Printer (D) Thermal Printer

25. In computer audio, what component amplifies low-level electrical sound signals to drive speaker cones?

- (A) Audio Amplifier (B) Graphic Card
(C) Inverter (D) Power Supply

ANSWER KEY

Q.No	Ans	Q.No	Ans	Q.No	Ans	Q.No	Ans	Q.No	Ans
1	(B)	6	(B)	11	(B)	16	(A)	21	(A)
2	(B)	7	(C)	12	(B)	17	(A)	22	(A)
3	(A)	8	(B)	13	(A)	18	(A)	23	(A)
4	(A)	9	(A)	14	(B)	19	(A)	24	(A)
5	(A)	10	(A)	15	(A)	20	(A)	25	(A)
