

INPUT & OUTPUT DEVICES PRACTICE SHEET

NIMCET TARGET PAPER • COMPUTER BASICS (EASY LEVEL)

ResourceOS

1. Which technology is primarily used in banks to read data printed on cheques?

- (A) OCR
- (B) OMR
- (C) MICR
- (D) BCR

2. Which of the following is an example of an impact printer?

- (A) Laser Printer
- (B) Inkjet Printer
- (C) Dot Matrix Printer
- (D) Thermal Printer

3. What technology is used by Optical Mark Readers (OMR) to detect marked responses on answer sheets?

- (A) Magnetic ink sensors
- (B) Light reflection and absorption
- (C) Thermal heat mapping
- (D) Pressure sensors

4. Which input device converts physical hand-drawn artwork or diagrams into digital vector formats?

- (A) Digitizer / Graphics Tablet
- (B) Barcode Reader
- (C) Trackball
- (D) Magnetic Card Reader

5. Resolution of a computer monitor or digital display is generally measured in which unit?

- (A) Dots Per Inch (DPI)
- (B) Pixels
- (C) Hertz (Hz)
- (D) Pages Per Minute (PPM)

6. Which of the following devices is capable of functioning as both an input and an output unit?

- (A) Touch Screen Display
- (B) Flatbed Scanner
- (C) Laser Printer
- (D) Optical Mouse

7. What is the print quality/resolution of a printer typically measured in?

- (A) PPM (Pages Per Minute)
- (B) DPI (Dots Per Inch)
- (C) CPM (Characters Per Minute)
- (D) BPS (Bits Per Second)

8. Which input device uses a photosensitive wand to draw directly on a CRT display surface?

- (A) Light Pen
- (B) Stylus Pen
- (C) Optical Mouse
- (D) Joystick

9. Which printer category uses liquid ink sprayed through ultra-fine nozzles to form print images?

- (A) Laser Printer
- (B) Inkjet Printer
- (C) Daisy Wheel Printer
- (D) Line Printer

10. A Plotter is specifically designed for which type of output application?

- (A) High-speed text document printing
- (B) High-quality vector graphics, architectural maps, and engineering drawings
- (C) Low-cost receipt printing
- (D) Scanning 3D physical objects

11. What type of consumable substance is used in a Laser Printer to produce printed characters on paper?

- (A) Liquid Ink Cartridge
- (B) Dry Powdered Toner
- (C) Ink Ribbon Strip
- (D) Thermal Wax Ribbon

12. Which input device contains a movable sphere held in a socket, requiring no physical movement across a pad?

- (A) Optical Mouse
- (B) Trackball
- (C) Touchpad
- (D) Joystick

13. Optical Character Recognition (OCR) software is used for which process?

- (A) Reading magnetic ink on cheques
- (B) Converting scanned image text into editable digital text
- (C) Evaluating multiple-choice exam OMR sheets
- (D) Decoding product bar code numbers

14. What is the primary operational mechanism behind a Thermal Printer?

- (A) Electrically striking pins against a ribbon
- (B) Selectively heating heat-sensitive special paper
- (C) Fusing powder toner using a laser beam
- (D) Spraying microscopic droplets of ink

15. What is the term for the time required by a display pixel to change from one color/brightness state to another?

- (A) Refresh Rate
- (B) Response Time
- (C) Aspect Ratio
- (D) Dot Pitch

16. Which key on a standard QWERTY keyboard acts as a toggle modifier for capital letters?

- (A) Caps Lock
- (B) Shift Key
- (C) Control (Ctrl) Key
- (D) Alt Key

17. Which device is used to convert analog audio sound signals into digital data formats for CPU processing?

- (A) Speaker
- (B) Microphone
- (C) Sound Card DAC
- (D) Audio Synthesizer

18. Which printer type prints an entire line of text simultaneously rather than character by character?

- (A) Dot Matrix Printer
- (B) Chain / Drum Line Printer
- (C) Inkjet Printer
- (D) Thermal Printer

19. What property does Dot Pitch measure in monitor screen display specifications?

- (A) The total screen diagonal length
- (B) The distance between two adjacent pixels of the same color
- (C) The number of frames drawn per second
- (D) The maximum contrast level of the display panel

20. Which I/O control technique requires continuous CPU checking of the device status register until the device is ready?

- (A) Programmed I/O (Polling)
- (B) Interrupt-Driven I/O
- (C) Direct Memory Access (DMA)
- (D) Memory-Mapped I/O

21. In which I/O scheme do I/O registers share the same address space as main memory registers?

- (A) Isolated I/O
- (B) Memory-Mapped I/O
- (C) Direct Memory Access
- (D) Programmed I/O

22. What is the main function of a Direct Memory Access (DMA) controller in a computer system?

- (A) Perform arithmetic logic operations for I/O units
- (B) Transfer data directly between I/O devices and RAM without constant CPU involvement
- (C) Decode user input keyboard signals
- (D) Manage cache memory replacement policies

23. What standard encoding system is printed on commercial products to represent numbers and data via parallel lines?

- (A) QR Code
- (B) Barcode
- (C) MICR Font
- (D) Braille Code

24. Which of the following is an example of a non-impact printer?

- (A) Laser Printer
- (B) Dot Matrix Printer
- (C) Drum Printer
- (D) Daisy Wheel Printer

25. What is the refresh rate of a monitor screen defined as?

- (A) The speed of printing pages per minute
- (B) The number of times per second the screen image is redrawn (in Hz)
- (C) The total color depth of a display pixel
- (D) The physical response time of LCD liquid crystals

ANSWER KEY

Q.No	Ans	Q.No	Ans	Q.No	Ans	Q.No	Ans	Q.No	Ans
1	(C)	6	(A)	11	(B)	16	(A)	21	(B)
2	(C)	7	(B)	12	(B)	17	(B)	22	(B)
3	(B)	8	(A)	13	(B)	18	(B)	23	(B)
4	(A)	9	(B)	14	(B)	19	(B)	24	(A)
5	(B)	10	(B)	15	(B)	20	(A)	25	(B)
